

API Solutions For UCC Transactions

Enhance Compliance and Streamline Workflow

Enhance your compliance practices by eliminating the need to re-enter UCC information, and streamline your workflow by minimizing keystrokes at the same time.

UCC TRANSACTIONS

JSON RESTFUL API

CORE BENEFITS

Direct B2B Interfaces

FCS provides risk mitigation solutions that put public records access inside your loan origination, factoring, or other business software.

Receive alerts that can flag potentially risky debtors, file UCCs directly from data already in your in-house systems, and respond promptly to Federal tax liens to retain your position on collateral.

JSON RESTful API

We offer a complete JSON RESTful application programming interfaces (API) for public records transactions including:

- UCC Search
- Business Search
- UCC Filing
- Monitoring of Debtors
- UCC/Lien activity and Business Entity changes
- Monitoring activity in US District Court, State Court, Bankruptcy Court records

Streamline Workflow

Complete your UCC due diligence from within a single system. Simplify the workflow for your organization by connecting your business line software directly to reliable, fast, and accurate public records search, filing and monitoring.
