

Protect Your Client Portfolio with Secured Party Representative Service

Introducing Secured Party Representative Service from First Corporate Solutions—the key to keeping your client list confidential while fulfilling all your public record needs.

Are Your Competitors Using Public Records Data to Poach Your Clients?

Did you know your competitors can target your client list by pulling your UCC financing statements and looking for the Secured Party? This is a popular practice among lenders trying to grow their prospective client list—at the expense of your client list. As you're probably aware, they can gather a great deal of data this way.

You do have options to protect your client list.

UCC Secured Party Representative Service from First Corporate Solutions provides protection from competitors using public records data to target your clients. You'll still perfect your security interest when you file a UCC-1, but we'll help limit your exposure to competitors' secured party searches.

How It Works

When you file a UCC with FCS, we put our name as secured party representative on the financing statement. By utilizing our UCC Secured Party Representative service, reverse UCC searching will no longer be an option for your competitors, keeping your client list more secure, and you will be able to track all your UCC filings within our portfolio manager just the same as before.

Easy To Use

1. Log in to our online system and begin creating a UCC as usual
2. The default secured party will be set as "First Corporate Solutions, as representative"
3. File as usual
4. FCS will notify you with any secured party requests for information
